PROFESSIONAL SUMMARY

Computer Science postgraduate pursuing an M.Sc. with hands-on experience in Machine Learning, Federated Learning, AI applications, full-stack development and Android development. Experienced with privacy-preserving Network Intrusion Detection Systems, REST APIs and database-driven applications using Python, Scikit-learn, XGBoost, Flower, SHAP, PHP, Kotlin and Firebase. Strong foundation in Data Structures, OOP, DBMS, Operating Systems and Computer Networks.

EDUCATION

P P Savani University **2025–Present**
M.Sc. Computer Science CGPA: 8.14/10

Veer Narmad South Gujarat University **2021–2024**
Bachelor of Computer Applications CGPA: 7.92/10

TECHNICAL SKILLS

Programming: Python, Java, Kotlin, C, C++, JavaScript, PHP, SQL
ML/AI: Scikit-learn, XGBoost, Pandas, NumPy, SHAP, Feature Engineering, Classification, Model Evaluation, Federated Learning
Cybersecurity: Network Intrusion Detection, Network Traffic Classification, Privacy-Preserving ML, Computer Networks
Federated Learning: Flower, FedAvg, Distributed Model Training, Differential-Privacy Concepts
Web/Backend: Flask, REST APIs, HTML, CSS, Bootstrap
Mobile: Android SDK, Kotlin, XML, Material Design, Firebase
Databases: MySQL, Firestore, Firebase Realtime Database
Tools: Git, GitHub, Jupyter, VS Code, Android Studio, Postman, Streamlit
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

Privacy-Preserving Federated Learning Network Intrusion Detection System (NIDS) `github`
Python, Scikit-learn, XGBoost, Flower, FedAvg, SHAP, Pandas, NumPy, Streamlit

- Developed a privacy-preserving NIDS using Federated Learning on the CICIDS2017 network-security dataset.
- Simulated distributed clients training locally and exchanging model parameters instead of raw network traffic using Flower and FedAvg.
- Classified network traffic across DDoS, Port Scan, Brute Force, Web Attack, Botnet, Heartbleed and Normal classes.
- Applied Gaussian-noise-based privacy protection and compared centralized vs. federated learning using classification metrics.
- Used SHAP to explain feature importance and built a Streamlit dashboard for model evaluation and visualization.

Internship Portal – Internship Management Platform `github`
PHP, MySQL, JavaScript, Bootstrap, Flask, REST APIs

- Developed an internship platform for students, companies and administrators with posting, applications, tracking and management workflows.
- Designed a normalized MySQL database, optimized SQL queries, and integrated an AI Resume Screening System through Flask REST APIs.

LeaveFlow – Employee Leave Management System `github`
Kotlin, Firebase Authentication, Firestore, Android Studio, XML

- Developed an Android leave-management system with Admin/Employee roles, authentication, leave workflows, history and profiles.
- Integrated Firestore for cloud synchronization and designed a responsive Material Design interface.

SecureTouch – Motion-Based Phone Security Application `github`
Kotlin, Android SDK, Sensors API, Firebase

- Developed an Android security app using motion sensors with PIN protection, configurable sensitivity, alarms and battery-efficient background monitoring.

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations (20 Hours)
- Google Cloud Skills Boost – Multiple Hands-on Labs
- Deloitte Data Analytics Job Simulation – Forage
- Accenture Software Engineering Job Simulation – Forage
